REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for determining Wavelet sub-band threshold parameters. Independent claims 1 and 9 identify the uniquely distinct feature, "for selecting a set of threshold parameters from a gain-threshold map in response to selected gain setting, wherein the gain-threshold map is stored in a memory and organized as a lookup table that maps a plurality of gain settings to a corresponding set of predetermined approximately optimal threshold parameters for each sub-band, thresholding each of the plurality of sub-bands according to the selected set of threshold parameters to provide thresholded sub-bands and performing an inverse Wavelet transformation on the thresholded sub-bands to provide the de-noised image". Independent claim 10 identifies the uniquely distinct feature, "for selecting one threshold parameter of the set of threshold parameters as the selected threshold parameter, applying the selected threshold parameter to provide a filtered sub-band and applying an inverse Wavelet transformation using the filtered sub-band and also using the

non-selected sub-bands to provide one of the plurality of test output images". The closest prior art, Kamath et al. (USPN 6,879,729 B2), disclose data de-noising system utilizing processors and Wavelet de-noising techniques. Data is read and displayed in different formats. The data is partitioned into regions and the regions are distributed onto the processors. Communication requirements are determined among the processors according to the Wavelet de-noising technique and the partitioning of the data; while Berkner (USPN 7,068,851 B1), discloses multiscale sharpening and smoothing with Wavelets, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
